MAINTENANCE

A. Storage

- When not using the massager, store it back in the box and place it in a dry, well-ventilated, cool area.
- Do not twist wires.
- Avoid sharp objects to prevent scratching surface of the product.
- Keep out of direct sunlight and high temperatures.

B. Cleaning

- Unplug power cord before cleaning.
- Use a dry cloth only to clean the surface of the product. Avoid direct contact with water.
- Do not use corrosive cleaners such as benzene or bleach products.
- The fabric pouch can be removed for cleaning.

C. Maintenance

- Keep the product clean and away from moisture.
- Cover up the product when not in use to avoid dust.

Warning: This product has an internal temperature protection device. When the safe temperature or safe heat use duration is exceeded, the heat will be turned off automatically. Please unplug the power to allow machine to cool after use.

Infinity Technical Support

If you have any questions about maintenance or are experience technical difficulties with your massager, please contact Infinity's technical support team at 603-910-5000 for assistance.

The following people should consult their doctor prior to using this massager:

- People with contagious skin conditions.
- People with osteoporosis or other bone and muscle conditions.
- People with heart disease and/or people with electrical medical instruments such as pacemakers.
- People with high fevers.
- Women who are pregnant.
- People with injuries or recovering from injuries.
- The massager has a heated surface. Those sensitive to heat should use this massager with caution.

MASSAGER OPERATION

A. Power button: Turns massager on/off

- Indicator light stays on when the massager is on. Power On defaults to the first Auto program.
- Once the massager is on, press the power button again to stop all functions. Indicator light will blink.

B. Air button: Controls air pressure intensity

- Adjust the intensity level.
 - Mode A** (Indicator light blinks slowly): Low intensity
 - Mode B** (Indicator light blinks quickly): Medium intensity
 - Mode C** (Indicator light stays on): High intensity
- Once a mode is selected, press the intensity button again to change the level of intensity.

C. Auto button: Controls Auto programs

- Cycle through the three available Auto programs with this button.
 - 1) Sooth** : Rolling message nodes are inactive while airbags and RockerTech® are activated.
 - 2) Relax**: Airbags, rolling message nodes, and RockerTech® are activated. Rolling nodes work intermittently.
 - 3) Refresh**: Airbags, rolling message nodes, and RockerTech® are activated. Rolling nodes work continuously.
- Press Auto a third time to enter Manual mode, in which you can manually adjust Air, RockerTech®, and Heat settings.

D. Type button: Controls RockerTech® tapping rhythm

- In Auto mode, toggle RockerTech® ON/OFF with this button. Once an Auto program is selected, press the Type button again to stop RockerTech® mode, press once more to start.
- In Manual mode, control RockerTech® and rolling message nodes modes.
 - Mode A** (Indicator light stays on): RockerTech® and rolling message nodes work continuously.
 - Mode B** (Indicator light blinks quickly): RockerTech® works continuously.
 - Mode C** (Indicator light blinks slowly): Rolling message nodes work continuously.
- Press Type a fourth time to stop the rolling message nodes. To select another mode, simply cycle through with the Type button.

E. Heating button: Turns on heating function

- Indicator light will turn on when foot heating function is turned on. Light will turn off when heat is off.
- Once heating function is on, press heating button again to deactivate heat.
- Please use the heat function with caution. Do not keep heat on for prolonged periods of time.

Message Session Time & Auto Shut-off

- The massager will automatically end the message session after 20 minutes. If another session is desired, please make a new selection.
- Multiple back-to-back uses could result in auto shut-off to prevent overheating. If this occurs, please wait at least 30 minutes to allow the motors to cool down before attempting to start a new session.
