

AUTO PAIRING SETUP

- 1 Take out both earbuds from the charging case, both earbuds will power on and enter pairing mode in which the LED flashes red and blue alternately.
- 2 Search Bluetooth name "Mpow Flame Solo" and select it in your mobile phone.

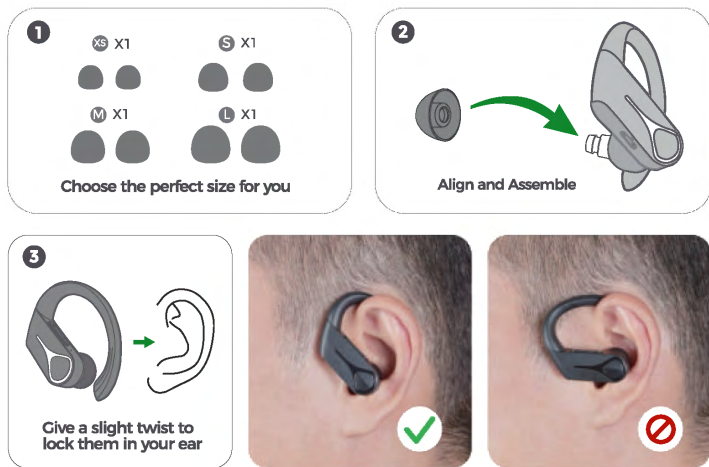

► OPERATION GUIDE

RESET

1. Turn off your device's Bluetooth function.
2. Take out both earbuds from the charging case and the earbuds will automatically enter into the pairing mode in which LED flashes blue and red alternately.
3. Simultaneously keep pressing both volume up and volume down buttons of either earbud for 3 seconds.
4. The paired information will be cleared and the earbuds will be off.

BUTTONS CONTROL

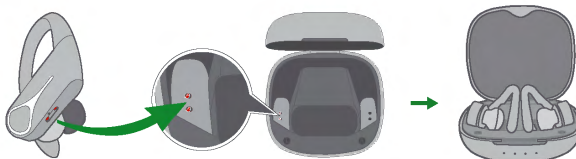

Q&A

► **Note:** Remove the insulating film on the charging connectors on both earbuds before charging it.

Q1: Why doesn't music stop when I put Flame Solo back into the case.

Reason 1: Earbuds might not be placed properly and not in the status of charging.
Solution: Make sure Flame Solo is being properly placed.

Reason 2: The charging case is out of battery.

Solution:

1. To recharge the case.
2. Or manually turn off the earbuds by keeping clicking the buttons on both earbuds for 5 seconds. The earbud's light will keep on for 1 second and then goes out with the voice prompt "Power off".

Q2: How to know the remaining battery of the charging case?

When you open or close the case, you will know the battery level by checking the indicator:

Battery Level	LED light
0%-25%	● ● ● ●
25%-50%	● ● ● ●
50%-75%	● ● ● ●
75%-100%	● ● ● ●

Q3: How to know the charging status and the full power status of the case?

Charging	Full power
Blue LED flashes	while all LEDs keep steady on for 5s and then they go out

Q4: How to operate if the Bluetooth disconnect or fail to reconnect?

Solution: Reset the earbuds by following the steps as previously mentioned.
